

Product Information

The Problem:

When leather is exposed to extreme environmental influences such as rain, sun, dirt etc., insects are especially prone to stubbornly to surfaces. The leather will eventually start to look tattered and worn as dirt penetrates into the leather's natural woven fibers. Pores are blocked, reducing breathability. Such soiling also accelerates the composition of the leather, making it less comfortable to wear over time. Other leather cleaning products tend to be liquid-based instead of gel-shaped and, because of leather's absorbency, do not remain on the surface long enough to loosen the dirt for a gentle cleaning process.

The Solution:

**LEATHER
CLEANER**

Product Advantages:

New formula: significantly better cleaning performance

- Very long application possible thanks to the gel formula
- Removes dirt such as insects effortlessly
- Removes soiling, such as insects with ease
- Gentle on the leather
- Optimum preparation for leather care
- Non-slip and colourless

Application Areas:

Matt and glossy leather including TFL-Cool®

Application:

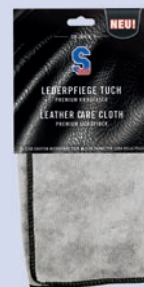

Spray directly onto the dirty area and allow it to act for approx. 1 minute. Use the S100 Leather Care Cloth in circular movements, applying gentle pressure to clean subsequently and rinse the cloth out frequently while doing so. After cleaning, rinse the cloth out thoroughly with clean water and wipe the cleaned areas off again while the cloth is damp.

Note: The clean and dry leather must be treated with a leather care product (such as S100 Leather Care or S100 Leather Balm) to seal the material again. Try first on a small less visible place to check for colourfastness and fading. Follow the clothing manufacturer's care instructions.

Tip:

After cleaning, it is important to re-supply the leather with nutrients to restore the moisture protection. Products especially suitable for this are the new S100 Leather Care and S100 Leather Balm. Also ideal for leather surfaces on sofas, car seats etc.

Recommendation:
S100 Leather Care Cloth for gentle and lint-free use
